The Evolution of the Agri-Food Sector Through New Technologies

Piraeus, January 30, 2024

The Piraeus Chamber of Commerce and Industry hosted the dissemination event of the STEM4Agri – STEM Practices For Modernising Agricultural Training program, focusing on agricultural innovation and collaboration between Greece and Cyprus. The event brought together a diverse range of farmers and producers from both countries, marking a significant milestone in the project's journey. Today's final event served as a platform to celebrate the project's achievements and share its results with key stakeholders and the wider community.

The event was introduced by Mr. Vasilis Korkidis, President of the Piraeus Chamber of Commerce and Industry, Mr. Stavros Voidonikolas, President of the Agricultural Cooperative of Attica, and Ms. Sofia Vana, CEO Global Food World. The event included presentations on two main themes. Mr. Dimitris Tsesmelis, Director of Technological Products and Services at Neuropublic SA, highlighted the topic of Smart Farming and the new Common Agricultural Policy (CAP), while the results of the European program STEM4Agri were presented by Mr. Dimitris Kyriakos, IT Specialist, MSc, MBA, MEd, PhD(C), Director of Public Vocational Training Institute of Egaleo and Member of the SSPAE of Western Attica, Piraeus & Islands, along with Dr. Dimitris Loukatos, Laboratory Staff at the Agricultural University of Athens.

At the end of the event, participants had the opportunity to engage in discussions and exchange ideas regarding the future of agriculture and the professional prospects it creates.
